J-PARC Center

# Opportunities

- Summer student : 2-3 months for some specific activities

- Ex.

- T2K related activities
  - Wagasaki studies
- G-2 related activities
  - Si detector studies for
  - Muon acceleration studies
  - Precision magnet studies

- Graduate course enrollment

- The U. of Tokyo

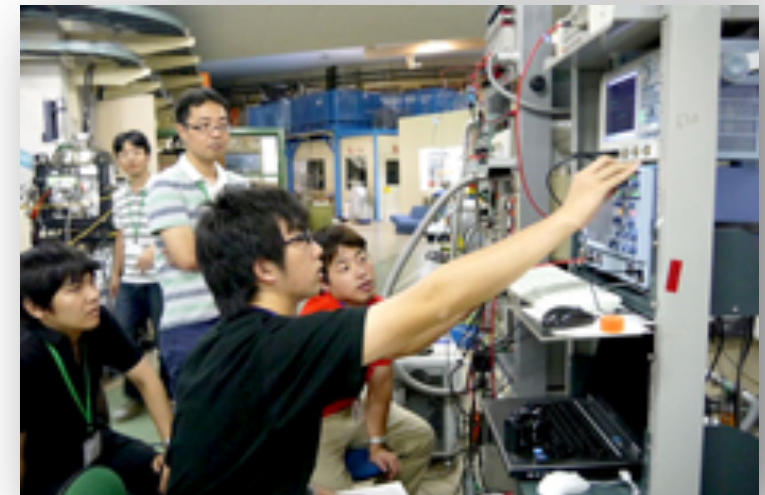

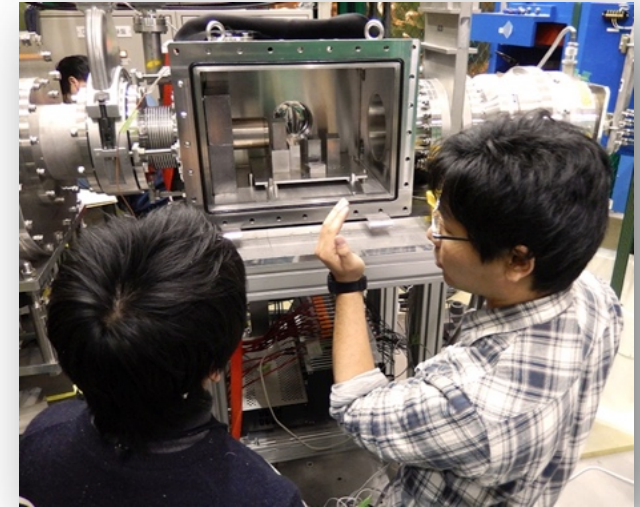

- Masashi YOKOYAMA - neutrino
- Naohito SAITO - g-2/EDM
- Tadashi KOSEKI - accelerator
- Kyoichiro OZAWA – Hadron Physics

- Sokendai (KEK graduate course)

- Takashi KOBAYASHI - neutrino
- Takeshi NAKADAIRA - neutrino
- Satoshi MIHARA – COMET
- Takeshi KOMATSUBARA – KOTO

- Other universities

# “Summer student program”

- It is not formally established program, but in practice we are proceeding as follows:

1. Contact Kobayashi-san : [Takashi.Kobayashi@kek.jp](mailto:Takashi.Kobayashi@kek.jp)

- Name
- Grade
- Area of interest
- Mentor in your own university

2. Skype interview

3. Decide on when to start

N.B.

\*May be able to cover airfare, but local cost can be certainly supported

\*If you intend to enter “Sokendai” there is a high chance to cover airfare.

## Goals and Objectives

### Overall Goal

A key aspect of graduate education at the University of Tokyo's Graduate School of Science (GSS) is that education is closely linked to research. Through the graduate school curricula, students learn how to carry out research effectively from faculty members who are active at the frontlines of research, thus enabling students to conduct advanced and creative research themselves. The overall goal of graduate education at the GSS is to develop and enhance the capabilities of researchers and educators possessing originality and ingenuity to conduct pioneering research at the frontlines of various scientific fields, act as core members of international and interdisciplinary research projects, and through their research and other activities, meet the needs of the industrial community and society at large.

### Educational Objectives

To realize the overall goal described above, the GSS has set the following educational objectives for the six departments of the GSS.

[...Read more](#) 

### Master's and Doctoral Degrees

A master's degree will be conferred to those who have completed a two-year period of residence, studied the compulsory subjects, earned the required number of credits specified by each department, and passed the thesis review and final examinations under the requisite guidance of an academic supervisor.

A doctoral degree will be conferred to those who have completed a three-year period of residence, studied the compulsory subjects, earned the required number of credits specified by department, and passed the thesis review and final examinations under the requisite guidance of an academic supervisor.

### Graduate Admissions Information

Special Selection for International Applicants (Master's and Doctoral Programs)
