

# Relativistic Mean Field Theory in Nuclear Physics

*Editors*

**S.K. Patra and A. Ansari**

*Institute of Physics*

*Bhubaneswar, India*

This volume is an outcome of a workshop on 'Relativistic Mean Field Theory in Nuclear Physics'. The topics covered are exotic nuclei, nuclear astrophysics, giant resonances, nuclear structure, reactions, nuclear matter and equation of state. The articles are written with emphasis on details on technique and methodology by a group of nuclear physicists who have adequate expertise through decades of experience, and are generally well known in their respective fields.

This book will be quite useful to the beginners as well as the practitioners in the field of nuclear structure theory.
