Title: Exploring Physics beyond the Standard Model with Flavour

Abstract: It is well known that the study of Flavour physics and CP violation plays an important role to critically test the Standard Model and to look for possible signature of new physics beyond it. In recent times, several anomalies are observed in the flavour sector, which may be considered as smoking-gun signal of Physics beyond the Standard Model. I will discuss how these tantalizing signals can guide us in exploring Physics beyond the Standard Model.

Date & Time: 18th August 2025, 4:00 PM IST

Venue: Prof. T Pradhan Lecture Hall, Block A, IOPB

Zoom Meeting ID : 883 4266 7561

Passcode : 500858

Organised and Moderated by

Prof. Sanjib Kumar Agarwalla

Institute of Physics, Bhubaneswar

Prof. Rukmani Mohanta
School of Physics
University of Hyderabad
