

INTRODUCTION TO SUPERSYMMETRY AND SUPERGRAVITY

Contents

<i>Foreword</i>	vii
<i>Editor's Note</i>	ix
<i>Preface</i>	xi
1. Introduction	1
2. Supersymmetry in Quantum Mechanics	7
2.1 Grassmann variables	7
2.2 Superspace in Quantum Mechanics	7
2.3 Supersymmetry Transformation	8
2.4 Invariant Lagrangian	9
2.5 Action Principle in Superspace	10
2.5.1 Equations of Motion	11
2.5.2 Quantisation	12
2.5.3 Hamiltonian	13
2.5.4 Supersymmetric Charges	14
2.6 Remarks	15
3. $SL(2,C)$ Representations of the Lorentz Group	17
3.1 $SL(2,C)$ and 2-spinors	17
3.2 Dirac Spinors	20
4. Superfields	23
4.1 Introduction	23
4.2 Chiral Superfields	25
4.3 Vector Superfields	26
4.4 Supersymmetric Lagrangian	28
4.4.1 Chiral Superfields	28
4.4.2 Vector Superfields	32
4.5 Outlook	35
5. Local Gauge Symmetry	37
5.1 Introduction	37
5.2 Gauge Invariant Lagrangian	37
5.2.1 Lagrangian for Matter Field	38
5.2.2 Lagrangian for Gauge Field	41
5.3 Electroweak Theory	46
6. Symmetry Breaking	52
6.1 Introduction	52
6.2 O'Raifeartaigh Mechanism	53
6.3 Fayet-Illiopoulos Mechanism	54
6.4 Supersymmetric $SU(5)$ Model	57
6.5 Low Energy Sector	59
6.6 Quantum Phase Transition	61
6.7 Grand Unification Models	64
6.7.1 $SU(5)$	64
6.7.2 $SO(10)$	65

6.7.3	E_6 and E_8	65
6.7.4	Proton decay, R-symmetry and R-parity	66
7.	Functional Methods in Superspace	69
7.1	Integration of Grassman Variables	69
7.2	Superspace Dynamics	70
7.3	Cancellation of Divergences	76
8.	Superspace and Supergravity: A Geometric Picture	81
8.1	Introduction	81
8.2	Differential Forms in Superspace	81
8.3	Local Supersymmetry	84
8.4	Gravity Multiplet	88
8.5	Chiral and Vector Multiplets	88
8.6	Chiral Densities and the Lagrangian	90
8.6.1	Chiral Densities	91
8.6.2	Lagrangian Construction	91
9.	Supergravity Lagrangian	93
9.1	Introduction	93
9.2	Lagrangian Construction	94
9.3	Identification of the Terms	98
10.	Model Building in Supergravity	103
10.1	Introduction	103
10.2	$SU(5)$	104
10.3	$SO(10)$ Models	107
10.3.1	Single Stage Symmetry Breaking	107
10.3.2	Models with Intermediate Scales	112
10.3.3	Generation of Unification Hierarchies	113
10.4	Superheavy Higgs Particles	118
10.5	Radiative Symmetry Breaking	122
10.6	Remarks	125
11.	Supergravity in Ten Dimensions	128
11.1	Introduction	128
11.2	Supergravity Lagrangian in Ten Dimensions	128
11.3	Heterotic Superstring Theory	133
11.4	Discussions	137
12.	Compactification of Higher Dimensional Theories	139
12.1	Introduction	139
12.2	Compactification in 10 Dimensions	139
12.2.1	Masses in Four Dimensions	140
12.2.2	Witten's Prescription	144
12.2.3	Geometry of Extra Dimensions	146
12.3	Superstring Based Supergravity	152
12.3.1	Wilson Loops	153
12.3.2	Spaces with $Z_5 \times Z_5$ Discrete Symmetry	156
12.4	Three Generation Models	157
12.4.1	Symmetry after Compactification	158
12.4.2	Yukawa Couplings and Symmetries	160
12.4.3	Intermediate Scales	165
12.4.4	Compactification with E_6 Going to $SU(6) \times U(1)$	169
12.5	Discussions	170
13.	Supersymmetry in Two Dimensions	175

13.1	Introduction	175
13.1.1	Spinors in 1+1 Dimensions	175
13.1.2	Superspace for 1+1 Dimensions	176
13.2	Supersymmetry in 1+1 Dimensions	177
13.2.1	Superfields in 1+1 Dimensions	177
13.2.2	Lagrangian Construction	178
13.2.3	Supersymmetry	179
13.2.4	Field expansions	182
13.3	Quantum Phase Transition	183
13.3.1	Breaking of Supersymmetry	184
13.3.2	Symmetry Breaking at Zero Temperature	184
13.4	Temperature Dependence of Phase Transition	186
13.5	Discussions	192
14.	Conclusions	193
14.1	Experimental Signatures	193
14.2	Preonic Models	195
14.3	Matrix Models	200
14.4	Remarks	204
Appendix A:	Construction of Calabi Yau Manifolds	207
A.1	Manifolds	207
A.2	Complex Structures	208
A.3	Hermitian Complex Manifolds	208
A.4	Differential Forms	209
A.5	Connections and Curvature	210
A.6	Kahler Manifold	210
A.7	Calabi-Yau Manifold	211
A.8	Betti Hodge Numbers	213
A.9	Examples of Calabi Yau Space	213
A.10	Examples of CICY spaces	215
A.10.1	CHSW Manifold	215
A.10.2	Tian Yau Manifold	216
A.11	Remarks	217
A.11.1	Harmonic Forms	217
A.11.2	Chern Classes and Euler Characteristic	218
A.11.3	Betti-Hodge Numbers and Complex Deformations	220
Appendix B:	Some Results in Group Theory	224
B.1	Dynkin Diagrams	224
B.2	Dynkin Labels	225
B.3	Representations	226
B.4	Symmetry Breaking	229
B.5	E_6 Symmetry Group	230
B.5.1	Embedding of G_{321} in E_6	231
